The Latest Regulatory Requirements for Cosmetics in China and the Opportunities and Challenges for Companies

Since the release of the Cosmetics Supervision and Administration Regulations (CSAR, State Decree No. 727) on June 29, 2020, a series of secondary regulations have been introduced, including the Measures for the Administration of Cosmetic Registration and Filing, Provisions on the Administration of Cosmetic Registration and Filing Data, Provisions on the Administration of New Cosmetic Ingredients Registration and Filing Data, Technical Guidelines for Cosmetics Safety Assessment, Cosmetics Classification Rules and Classification Catalogue, Standard for the Evaluation of Cosmetic Efficacy Claims, Measures for the Supervision and Administration of Cosmetics Production and Operation, Measures for the Administration of Cosmetics Labeling, Provisions on Supervision and Administration of Children's Cosmetics, etc. Based on the Cosmetics Supervision and Administration Regulations, the new regulations will be a major change in the cosmetics industry. How to correctly interpret the requirements of a series of new regulations and make accurate and timely adjustments within the limited transition time has become a huge challenge for enterprises. The professional team of Personal and Home Care Division of CIRS Group China has combined years of experience in dealing with regulations to introduce the latest regulatory requirements for cosmetics in China through the following aspects, helping companies to smoothly cope with the new regulatory requirements and lay the foundation for industrial upgrading.

- List of latest regulations
- Main contents and changes of the Cosmetics Supervision and Administration Regulations
- Work priorities for companies to deal with during the transition period
- How to place cosmetics in China market from regulatory point of review
- Registration and filing process and dossier requirements for adult and children's cosmetics
- How to exempt animal testing
- How to carry out cosmetic safety assessment
- New direction of cosmetic labeling management
- Cosmetic efficacy claims and evaluation requirements
- Successful case studies
