Evolving chemical regulations such as the implementation of One Enterprise, One Product, One QR Code for hazardous chemicals in China and emerging REACH-like regulations in APAC countries are creating new regulatory challenges for chemical companies operating in China in 2023. In addition, the revised Cosmetic Supervision and Administration Regulation (CSAR) brings new opportunities for new cosmetic ingredient innovation but also more compliance obligations on cosmetic ingredients.

Join us in Shanghai office on April 26, 2023, for further interpret related policies for chemical and cosmetic industry. Topics include the latest QR code implementation for hazardous chemicals in China, the latest developments of REACH-Like regulations in Asian Pacific countries and practical compliance advice for cosmetic ingredients under CSAR.
